## Armourbond Flash

SELF-ADHERING BASE SHEET FLASHING

### Tough

Armourbond Flash incorporates a tough non-woven reinforced polyester mat strengthened with select glass fiber strands. The mat is coated top and bottom with select SBS polymers and premium asphalt to a thickness of approximately 2.5 mm (98 mils).

### Film Coated Top and Release Bottom

A thin micro-perforated film covers the top surface of the product, while the self-adhering underside is covered by a removable silicone treated release film.

### Perfect for Flashing

Armourbond Flash may be placed in flame-sensitive areas for base flashing details where a heat fused cap flashing will be used.
